ABOUT ME

Blockchain Full Stack Engineer with 3+ years of experience building scalable Web3 applications, smart contract systems, and real-time trading platforms. Specialized in Solidity, gas optimization, and end-to-end dApp architecture across Ethereum and Polygon. Delivered production-grade ICO platforms, NFT marketplaces, and trading dashboards handling real-time transactions and on-chain integrations. Strong focus on performance, security, and user-centric system design.

EXPERIENCE

ZenX Tech

March 2025 – Currently Working

Remote

- ✓ Designed and deployed scalable smart contract architectures for multiple blockchain applications (ICO, NFT, trading systems)
- ✓ Implemented gas optimization strategies reducing transaction costs and improving execution efficiency
- ✓ Led end-to-end dApp integration (frontend + backend + blockchain)
- ✓ Ensured contract security using OpenZeppelin standards and best practices (reentrancy protection, access control)

ESP Softtech

June 2022 - Feb 2025

Indore, India

- ✓ Built an educational trading platform offering interactive tools, real-time market insights, and structured video courses to help users learn trading effectively.
- ✓ Engineered Web3-integrated dashboards for asset monitoring, automated signals, and user analytics, along with backend APIs and smart contracts for seamless MATIC/USDT operations.

PROJECTS

Equalizer Exchange

- ✓ Developed decentralized exchange (DEX) enabling secure peer-to-peer crypto trading
- ✓ Integrated smart contracts with frontend using Web3.js for seamless transaction execution
- ✓ Built backend APIs to handle asset tracking, transaction history, and user analytics
- ✓ Focused on security, gas efficiency, and real-time data synchronization

Mr. Mint

- ✓ Built ICO token launch platform supporting multi-token payments (BNB, USDT)
- ✓ Designed vesting smart contracts with configurable release schedules and bonus logic
- ✓ Enabled secure and scalable token distribution with on-chain validation

Art Fungible

- ✓ Orchestrated the creation of an NFT minting platform and marketplace on the Ethereum network, empowering real artists to transition into the digital realm with their unique artwork, fostering creativity and innovations.

Tradelive24

- ✓ Engineered a Web3-integrated trading dashboard for real-time asset monitoring, user portfolio analytics, and automated trading signals.
- ✓ implemented backend APIs and smart contracts for live trade synchronization and seamless MATIC/USDT integration.

Additional projects available on my portfolio website.

EDUCATION

Bachelors of Technology (IT)

2021

Malwa Institute of Technology, Indore, India

PCM + PE

2017

Prestige Public School, Indore, India

SSC

2015

Vidhya Sagar School, Indore, India

SKILLS

Blockchain: Solidity, Web3.js, Ethers.js, Hardhat, Truffle, Ganache, IPFS, Alchemy

Frontend: ReactJS, NextJS, Vite, HTML5, CSS3, Redux Toolkit

Backend: NodeJS, NestJS, ExpressJS, REST API, WebSockets, MongoDB, MySQL

DevOps: AWS (EC2, S3, CloudFront), Docker, Nginx, GitHub Actions

Other: Tokenomics, ICO/IDO, NFT Marketplace, UUPS Proxy, Multisig, Chainlink
